**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1) This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) a method and apparatus wherein the web treatment substance is applied to the transfer belt;
- b) a method and apparatus wherein the web treatment substance is applied into a nip formed between the web and the transfer belt;
- c) a method and apparatus wherein the web treatment substance is applied to the web;
- d) a method and apparatus wherein the web treatment substance is applied to the roll.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 1731

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 59-60, 65-68, 73-75, 81, 84, 87, 90, 94, 99, 101, 105, 109-110, 116-120, 122, 125, correspond to a method and apparatus wherein the web treatment substance is applied to the transfer belt;

Claims 63-64, 67-68, 83, 89, 111, 123, correspond to a method and apparatus wherein the web treatment substance is applied into a nip formed between the web and the transfer belt;

Claims 48, 52, 60-62, 66, 68, 75, 82, 86-95, 111, 123, 126, correspond to a method and apparatus wherein the web treatment substance is applied to the web;

Claims 71-72, 115, 124, correspond to a method and apparatus wherein the web treatment substance is applied to the roll.

The following claim(s) are generic: 47, 49-51, 53-58, 61, 69-70, 76-80, 85, 96-98, 100, 102-104, 106-108, 112-114, 121, 127.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Species of a) includes the technical features of a method and apparatus wherein the web treatment substance is applied to the transfer belt, not included in species b), c), d);

Art Unit: 1731

Species of b) includes the technical features of a method and apparatus wherein the web treatment substance is applied into a nip formed between the web and the transfer belt, not included in species a), c), d);

Species of c) includes the technical features of a method and apparatus wherein the web treatment substance is applied to the web, not included in species a), b), d);

Species of d) includes the technical features of a method and apparatus wherein the web treatment substance is applied to the roll, not included in species a), b), c).

2) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
